This is clearly just a card farming game, but I got it for like 15 cents as part of a bundle and I can legitimately say I'm not disappointed with it.

6/10, 0/10 if you for some reason think you should buy it at full price though. Time Crisis meets Super Hot. Rail mode is the only way to play; touch pad locomotion makes it too easy imo. Great sound track that really hypes up the gameplay (I normally turn music off in games but this one the music adds so much (with the visuals going to the metre of the music, feels like being at a concert with the visuals). So far this is my favourite single player shooter experience and puts Arizona Sunshine to shame. +100 points to the Devs for actively updating the game!. Issa good skin. If you wanna spend money and play Kragg, here ya go.. How this game was presented was simply amazing. It really was made with the upmost care and respect to those with ASD. Of course I had to play it being on the spectrum and I was disappointed. It really could be a good tool to those who might not understand Autism or who wish to understand the disorder better.. Splice is a puzzle game where you need to rearrange cells into a certain tree structure. The game doesn't explain how it works. But it tries to introduce new mechanics slowly. This would be fine if the mechanics would be something you would have seen before. Like in Megaman where your dude shoots something on the title screen. Or when you want to evade an enemy that you can jump over it as humanoid. In Splice these mechanics aren't things you have seen before. So every time it introduces a mechanic you are stuck figuring out the mechanic. Figuring out how the game works is more of a challenge than the puzzles themselves. That made the game more frustrating than fun.. Very interesting and challenging puzzle game. I like the fact that there were no instructions and it really required you to figure out everything yourself. The game does provide some hints though.. Fun little story about a stickman trying to save his friend.

This is a good find. The art is amazing, the gameplay mechanics are very cool and the puzzles are a good challenge, but nothing that will get you stuck.

The main flaws are two:

1. The controls are not as responsive as I would like, specially when jumping. The game do not require pixel-perfect jumps, so it's not a big issue.
2. The level design is not bad, but could use some improvements. On later levels, you don't know what each lever/pressure plate activates, so you have learn via trial and error. The boss stages are not really "boss fights", but rather "boss escapes". I know it's hard to design boss fights for a puzzle plataformer, but even so I think they should have more action.

Each level is very short, which can be annoying at first but later becomes a blessing. The last stages can be very unforgiving so it's not a big deal when you have to to restart from scratch.

Even with those issues, overall it was a great experience, it's very fun to sync all your copies to beat a stage. If you like puzzle plataformers, grab this game whenever you see it on sale.. It's a good game and good to train up your brain .. It could be a lot better if the graphic is better.. Overall the game feels very unpolished, with event notifications scattered all over the world map, messes of text piling up in one spot, and a lack of any sort of in game tutorial or instructions.

While I found the idea interesting, the game was frustrating to follow, and also nearly pre-emptively decided who would win any age (the seven rounds the game is divided into) after the first, as it would play through what looked like thirty turns with no input or control on behalf of the player. Often another cult would end up with enormous amounts of faith (one of the two types of tech points) , and on on occassion my cult seemed to be wiped out during those turns. One session of the autoplay ended with several notices that I could not recruit more disciples, indicating that the AI in control of the player's side was simply spamming the recruit action for no good reason. The flipside is that the game might wind up crippling all the other cults and leave yours dominant at the beginning of the age.

My main complaint is that this is a strategy game in which a significant portion of the strategy is conducted by a remarkably clumsy AI, rather than the player.. Nicely made. Leaves with entertainment for few hours (or more if you are blind like me). Especially good if you are collecting perfect games - and cards are worth 0.10+ so...
